LEARNING FROM EVENTS: TODAY

TWO MAIN APPROACHES

➤ DENSE

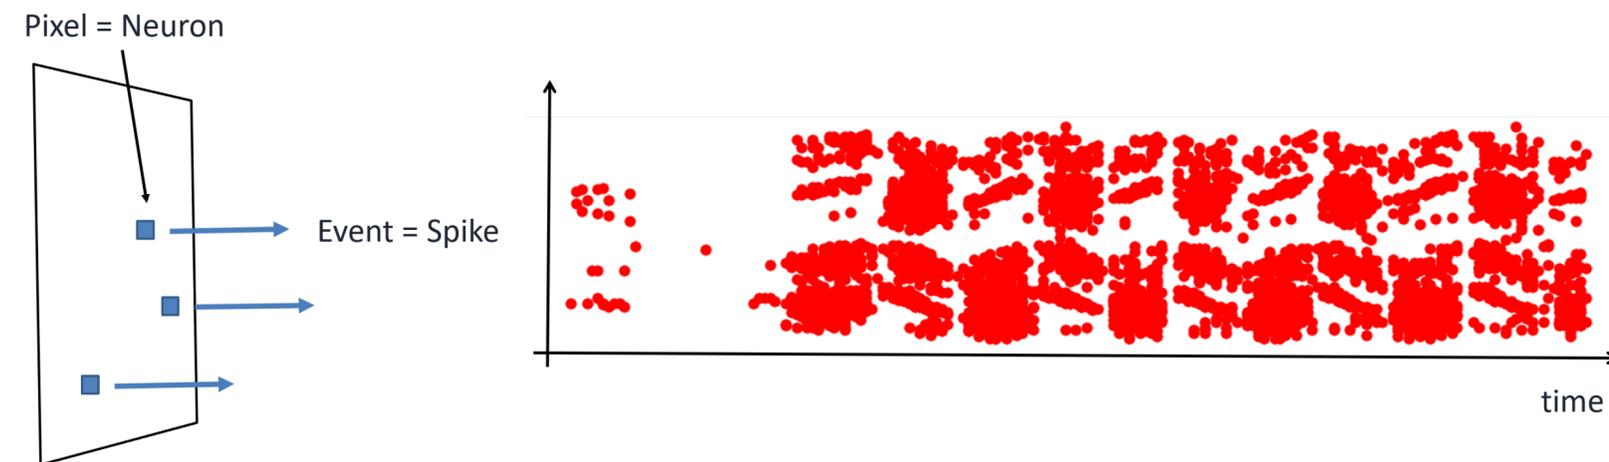

➤ Example: histograms, time surfaces, ...

- ⊕ Can leverage Frame-based Algorithm and Hardware
- ⊖ Latency, Power Consumption, Lose Sparsity

➤ SPARSE

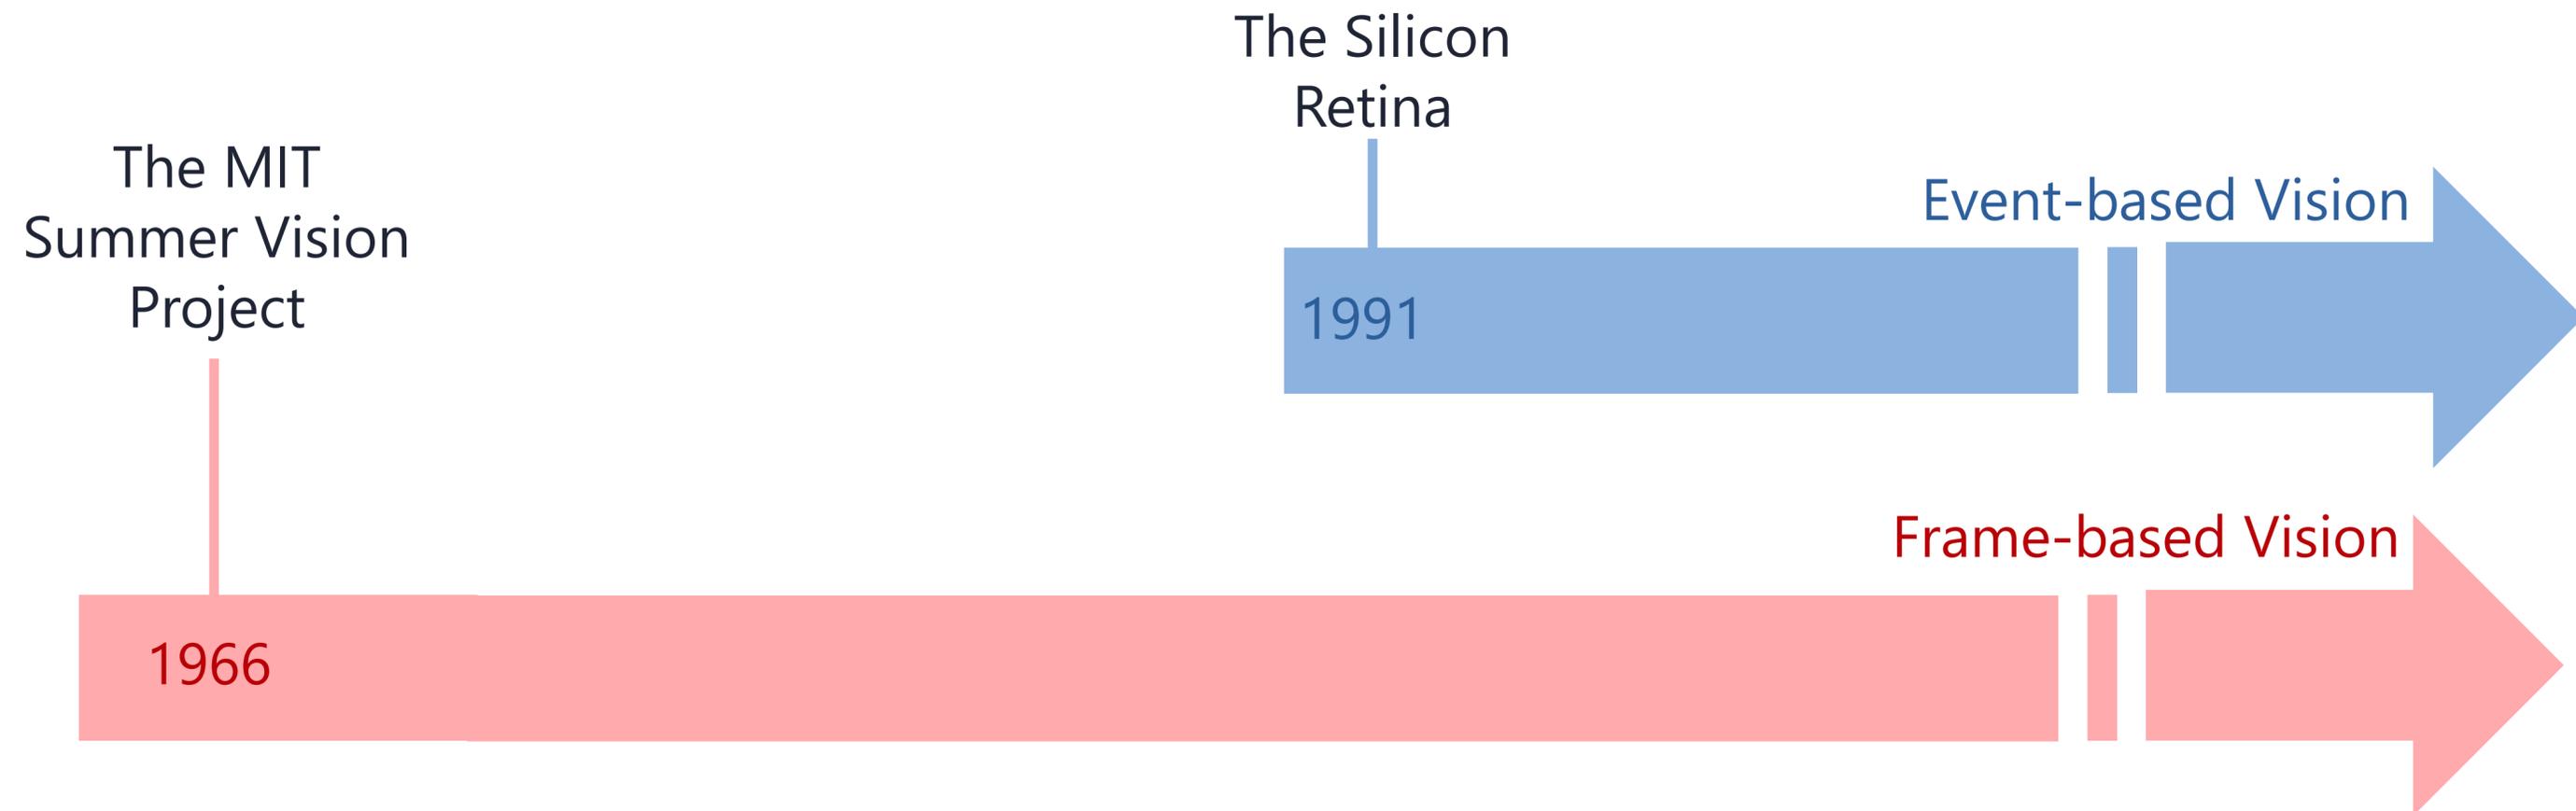

➤ Example: Spiking Neural Networks

- ⊕ Low latency, Low Computation
- ⊖ Limited in Size and Resolution, Limited by Hardware

LEARNING FROM EVENTS: TODAY

⊙ EVENT-BASED VISION IS STILL AT ITS EARLY STAGES
